

KU 16-40A SWITCHES

The LoadSafe product family is known for its reliable and high-quality switches, and the series has now received a significant update. With the introduction of new 6- and 8-pole KU 16-40A switches, along with changeover switches, the LoadSafe series offers an even more versatile selection to meet the demanding requirements of industrial and construction applications.

The KU 16-40A switches can now be expanded to 6- and 8-pole configurations using the new parallel kit. Additionally, the changeover kits enable compact and high-performance changeover switch solutions. Open transition changeover switches (1-0-2) are designed to switch loads between two sources, making them ideal for backup power solutions. Closed transition changeover switches (1-1+2-2) allow both switches to be in an intermediate "on" position, ensuring a seamless transfer without interruption. These switches are commonly used in uninterrupted power supply (UPS) systems.

LoadSafe KU and RT switches are VDE-approved and tested by independent third party testing laboratory, ensuring compliance with international safety and quality standards. Our switches and accessories manufactured in Finland offer high performance and installation efficiency, enabling you to build reliable power distribution solutions.

Discover our UL Listed range here

FEATURES:

- Easy to install on a DIN rail or screw mounting.
- Compact design provides more space for wiring.
- Available with fixed auxiliary contact versions (NO) or with separate auxiliary contacts.
- Switch technology by means of silver contacts ensures safe and durable operation.
- KU switch will be delivered with black direct handle. KU switches can also be used with external shaft and handle.
- KU 16-40A switches have over 20% smaller carbon footprint compared to the older generation.
- Tested according to IEC 60947-3.

SPECIFICATIONS:

KU 16-40A SWITCH ACCESSORIES

With parallel kits (PK) designed for the KU 16-40A range, it is possible to extend the functionality to 6- and 8-pole applications. Additionally, open transition (CO) and closed transition (CT) changeover kits enable versatile changeover solutions. Various handle options are also available to suit different needs.

The switches are available with **fixed auxiliary contacts** (NO), offering a compact solution that saves time and reduces installation complexity. If needed, **separate auxiliary contacts** are also available, providing flexibility for more extensive connection solutions.

Switches are also available in enclosures, for example in the KU 640 M3 enclosure as shown in the image.

KU 640NO with fixed NO (normal open) auxiliary contact (KU340 switch + KU 340NO switch + PK40KU3P parallel kit)

KU 340CO open transition changeover switch (1-0-2) and two separate auxiliary contacts (1NO40KU) on both sides

FEATURES:

- With parallel kits it's possible to extend the range to 6- and 8-pole applications
- Available in open (CO) and closed transition (CT) changeover kits
- Separate auxiliary contacts available 1NO (normal open) or 1NC (normal closed) versions.
 One to two auxiliary contacts can be mounted on the either side of the switch.
- 2-, 4-, 6- and 8-pole versions are compatible with handles LKX50, LKX50YR, LK10 and LK10YR. Changeover applications require 1-0-2 handle, LKX50CO/LKX50COYR (open transition) or 1-1+2-2 handle, LKX50CT/LKX50CTYR (closed transition).
- Compatible with LXXXAD11 and LXXXAD11VT shafts (XXX is length of the shaft in millimetres).

RT 16-40A SWITCHES

Compact and robust LoadSafe RT 16-40A switches are specifically designed for door-mounting applications. These innovative switches can also be installed on the side of an enclosure, providing added flexibility for your setup. LoadSafe RT switch is the most installation-friendly door-mounted switch on the market for a quick and effortless installation process. Wiring is done from the back of the switch and no mounting screws needed.

Our RT series includes 3-pole door mounting switch solutions, complemented by a variety of accessories such as auxiliary contacts (1NO40RT and 1NC40RT) and handles (LKX50, LKX50YR, LK10RT, and LK10RTYR) to enhance installation options.

FEATURES:

- Door mounting switch (RT)
- RT switch available as 3-pole version.
- Switch technology by means of silver contacts ensures safe and durable operation.
- A handle is required for installation. The RT-switch is compatible with handles LKX50, LKX50YR, LK10RT, and LK10RTYR.
- Tested according to IEC 60947-3.
